1.3 Specifications

CPU	Vortex86SX 300MHz		
RAM	256MB DDR2 Onboard		
BIOS	AMI BIOS		
Bus	PC/104 standard compliant PCI-104 (Optional)		
Display	SM712 Chipset with VGA, TFT-LCD, and 18-bit LVDS Flat Panel Interface VGA: Maximum resolution up to 1280 x 1024 @ 60Hz TFT-LCD: Maximum resolution up to 1024 x 768 @ 60Hz LVDS (Optional): Maximum resolution up to 1024 x 768 @ 60Hz		
LAN	Integrated 10/100Mbps Ethernet x1		
Audio	CM119B USB audio controller (Optional)		
Disk Support	IDE DoM	Compact Flash (Optional)	Onboard 2MB SPI Flash
SRAM Support	512KB (Optional)		
I/O Interface	RS232 x3 USB2.0 x4	16-bit GPIO x1 RS232/422/485 x1	Parallel x1
Connectors	2.54mm 4-pin pin header for +12V, -12V, -5V, GND x1 2.54mm 2-pin pin header for Reset x1 2.54mm 3-pin pin header for RS485 x1 2.54mm 104-pin PC/104 connector x1 2.54mm 10-pin box header for RS232 x3 2.54mm 26-pin box header for Parallel x1 2.54mm 20-pin box header for 16-bit GPIO x1 2.54mm 10-pin box header for USB x2 2.0mm 44-pin box header for IDE x1 2.0mm 44-pin box header for LCD x1 2.0mm 16-pin pin header for LVDS x1 (Optional) 1.25mm 4-pin wafer for Line-in/MIC-out x2 (Optional) 9-pin D-Sub male connector for RS232 x1 D-Sub male connector for VGA x1 RJ45 connector for Ethernet x1 Mini DIN connector for Keyboard/Mouse x1 4-pin male power connector x1 Type I/II Compact Flash Slot x1 (Optional)		
Power	DC +5V @ 660mA		

Requirement		
Operating Temperature	-20°C - +70°C	
Temperature	-40°C - +85°C (Optional)	
Dimension	184 x 122mm	
Weight	180g	
O/S Support	Windows Embedded CE6.0	Linux
	Windows Embedded CE5.0	DOS

2.6 Watchdog Timer

Two watchdog timers are equipped in Vortex86DX SoC. One is compatible with M6117D watchdog timer and the other one is new. The M6117D compatible watchdog timer is called WDT0 and the new one is called WDT1.

Sample code in DOS, Linux, and WinCE operating system is available. For more details, please refer the links <http://www.dmp.com.tw/tech> or <http://www.dmp.com.tw/tech/vortex86dx/>

2.7 GPIO

40 GPIO pins are available on Vortex86SX. All GPIO pins are independent and can be configured as inputs or outputs, with or without pull-up/pull-down resistors.

Sample code in DOS, Linux, and WinCE operating system is available. For more details, please refer the links <http://www.dmp.com.tw/tech> or <http://www.dmp.com.tw/tech/vortex86dx/>

2.8 SPI Flash

SPI Flash is often configured as a disk for booting up system or as floppy (A: Driver or B: Driver). Users may need to know how to do BIOS setup configuration for SPI flash and boot it up in DOS.

2.9 PWM

Pulse-width modulation (PWM) of a signal or power source involves the modulation of its duty cycle, to either convey information over a communications channel or control the amount of power sent to a load.

The popular applications of pulse width modulation are in speed control of electric motors, volume control of Class D audio amplifiers or brightness control of light sources and many other power electronics applications.

The Vortex86SX SoC integrated 32 channels of PWM interface enabling the Automation, robotic industry to a New Age x86 SoC platform and we also offer the sample code of PWM which will guide the engineer to control the PWM functionality smoothly.

For more inquire of this sample code that please contact our sales team or mail to:

3 Driver Installation

VGA

The Vortex86SX processor also uses external Display chip “SM712” which is an ultra low powered graphics chipset. It is capable in providing VGA display output up to 1280x1024. With LCD interface, developers could easily connect flat Panel to support TFT and LVDS output.

LAN

The Vortex86SX processor also integrated 10/100Mbps Ethernet controller that supports both 10/100BASE-T and allows direct connection to your 10/100Mbps Ethernet based Local Area Network for full interaction with local servers, wide area networks such as the Internet. I/O and IRQ settings can be done by software with the supplied utility software, or it can be set for Plug and Play compatibility. The controller supports: Half / Full-Duplex Ethernet function to double channel bandwidth, auto media detection.

AUDIO

CM119B is a highly integrated single chip USB audio controller specifically for VoIP (Voice over internet protocol) application. All essential analog modules are embedded in CM119B, including dual DAC and earphone driver, ADC, microphone booster, PLL, regulator, and USB transceiver. 8 GPIO pins can constitute a 24 key matrix directly support keypad control function without MCU.

Many features are programmable with jumper pins or external EEPROM. Vender can customize unique USB VID/PID to EEPROM for VoIP software authentication. Moreover, individual unique phone number for each device is possible via serial number stored in external EEPROM.

Operating system support

The Vortex86SX-6124 Half-size CPU board provides the VGA and LAN drivers for DOS 6.22 Windows CE 5.0 and CE 6.0.

4 Software Resources

4.1 ICOP Technical Resource Website

In the following website, you will find our OS support resources such as evaluation images for Window CE operating systems. For details, please kindly visit the following link: <http://tech.icop.com.tw/>

Technical Support Directly from ICOP

To offer you more accurate and specific solutions for the technical situations you have, please prepare the information below before contacting ICOP:

- Product name and serial number

- Description of the H/W environment (i.e.: working temperature, I/O board information, information of connection between main board and IO boards, and/or other devices, etc)

- Description of the S/W environment (i.e: operating system, version, application software, and/or other related information, etc.)

- A detailed description and photos of the technical situation

- Any complement or technical situations you want ICOP more focusing on

User Manual Feedback

To make this user manual more complete, if you have any comments or feedbacks to this manual, please feel free to write to info@icop.com.tw or contact your ICOP sales representative.

Flat Panel Wiring and Lighting

Hardware

Before you connect the TFT LCD Flat Panel with Vortex86SX-6124-V3, please make sure that the input Voltage of LCD is 3.3V or not.

BIOS

Please contact or e-mail our regional sales to get the special BIOS for any TFT LCD Flat Panels.

Wiring LCD Cable

Please refer to Page 8 ([J2: LCD connector](#)). For more LCD lighting and integration service, please contact our regional sales or mail to info@icop.com.tw if you have any questions.

TCP/IP Library for DOS Real Mode

DSock is a TCP/IP library for DOS real mode, which is used by RSIP. It provides simple C functions for programmer to write Internet applications. ICOP also provide Internet examples using DSock: BOOTP/DHCP, FTP server, SMTP client/server, HTTP server, TELNET server, Talk client/server, etc.

DSock provides a lot of example source code. Programmer can add Internet functions to their project easily and save development time. With a utility "MakeROM", programmer also can make a ROM image to fit their application, those examples can be seen in the following Application systems: Mity-Mite Serial Server, Web Camera Tiny Server and RSIP Serial Server.

DSock is free for All ICOP products using M6117D/Vortex86/Vortex86SX/Vortex86DX CPU and ICOP also provide the business version of DSock for those customers who are using other x86 CPUs.

If you would like to use DSock or business version of DSock, Please mail to info@icop.com.tw or contact your regional sales.

Please download the trial DSock software and Utilities from our website:

BIOS Default Setting

If the system cannot be booted after BIOS changes are made, please follow below procedures in order to restore the CMOS as default setting.

- Press **“End”** Key, when the power on

- Press **** to enter the AMI BIOS setup
- Press **“F9”** to Load Optimized Defaults
- Press **“F10”** to Save configuration changes and exit setup

Warranty

This product is warranted to be in good working order for a period of one year (12 months) from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it without additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster. Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, originality to use this product. Vendor will not be liable for any claim made by any other related party. Return authorization must be obtained from the vendor before returned merchandise is accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description. Should you have questions about warranty and RMA service, please contact us directly.
